Tools & Frameworks: Git, React.js, Next.js, Tailwind CSS, MUI, API Development

Development: UI/UX Responsive Design, Front-End Engineering, Real-time Data Processing

Systems: Linux, Unix, Windows

PROJECTS

<https://github.com/louisromeo1>

[YouTube Clone Application:](#)

January 2025

- Independent React.js application using MUI, a YouTube API ([RapidAPI](#)), and high-level [JavaScript JSX](#) deployed to build a fully functioning app modeling the layout of YouTube.
- Demonstrates a strong working knowledge of front-end website design and development as well as using and understanding APIs for advanced data collection.
- Employed a responsive design for mobile-friendly usage.

[UFC Fight Predictor:](#)

Fall 2024 - Present

- Engineered Python programs to analyze UFC statistics, utilizes machine learning concepts (sklearn and matplotlib) to provide predictive insight into UFC fights.
- Explored statistical significance and data-driven predictions in mixed martial arts (MMA) while displaying expertise in modeling and sports analytics.

[Tucson Crime Data Analysis:](#)

Fall 2024

- Data science initiative utilizing Python libraries/models to identify and analyze factors contributing to crime rates and types in Tucson.
- Collaborated in a team environment with clear communication and task distribution.
- Produced a comprehensive [report](#) showcasing our results, advanced data analytics and evaluation techniques.

[Portfolio Website:](#)

Summer 2024

- Developed my own professional portfolio website using HTML, CSS, and JavaScript.
- Emphasized responsive design and user experience to highlight technical skills and projects effectively.

PROFESSIONAL EXPERIENCE

Software Development & Front-End Engineering

Independent Projects

- Engineered responsive UI/UX designs using React.js, TypeScript, and Tailwind CSS for web and mobile applications.
- Developed applications using APIs for real-time data processing.

OTHER SECTIONS:

Languages: Fluent in English; Conversational Proficiency in Italian and English
